

New DVB-S2X satellite modulator with dual IF and RF signal outputs, CID insertion and multi-stream over IP

Dubai, March 10, 2015 – **TeamCast**, the world renowned leader in digital modulation technologies for Digital Terrestrial Television (DTT), Wireless Transmission and Satellite Applications, is introducing the 3rd generation of its successful **Vyper** satellite modulator at CABSAT 2015.

This new **Vyper** is indeed combining two products in one, offering both IF and RF (L-Band) signal outputs on a single product, for a maximum flexibility in system built-up, operation and maintenance.

Additionally, it offers **CID insertion**, responding today to the short term requirements for use in the USA (2016 for DSN application, and 2018 for all applications) and is therefore ready for the future, worldwide.

Vyper also supports **multi-stream** operation through IP inputs, in addition to multi-stream through ASI inputs.

And it is of course **DVB-S2X compliant**, with new MODCOD, 64APSK modulation and low Roll-Off values, like the previous model was, for maximum transmission efficiency.

*"Vyper, the well known and highly acknowledged satellite modulator developed by TeamCast, is continuing its road towards optimized operational capabilities, with a long term view, and best return on investment to our customers, thanks to its unique evolutionary platform" says **Christophe Trolet**, Business Unit Manager at TeamCast.*

About TeamCast:

TeamCast is a renowned and highly active member of the Digital TV ecosystem worldwide, with innovative technology offerings based on a solid expertise in Satellite and Terrestrial Digital TV transmission.

Created in 2003, and based at Rennes in France, TeamCast is deeply involved in the development, definition and verification of numerous broadcasting standards.

Today, major clients in the Broadcasting Industry from 50 different countries invest their confidence in TeamCast and its products. TeamCast has offices in Elmira (New York) and in Singapore to support the development of its business in North America and Asia, and to provide local sales and technical support services to its customers.
