

## ***TYGER: new High Throughput Satellite Modulator***

**National Harbor (MD), March 7, 2016** – **TeamCast**, the world-renowned leader in digital modulation technologies for Digital Terrestrial Television (DTT), Wireless Transmission and Satellite Applications, is announcing as a **Brand New Premiere Product**, the **Tyger** satellite modulator at Satellite2016.

**Tyger** is a new satellite modulator from TeamCast offering the same high performance level as previous Vyper modulators, with the benefit of an unprecedented high throughput. Tyger offers rates up to 480 Mbauds for DVB-S2 and DVB-S2X standards (several Gbits/s rate). Furthermore, to maximize capacity and spectrum efficiency, it uses a GSE encapsulation to enable IP transport with a very small overhead.

Last, it is also meeting the requirements of the DVB "Annex M", making it capable of mixing broadcast and broadband services over the same satellite carrier.

*"This new modulator opens new possibilities for operators in terms of capacity, spectrum efficiency and flexibility. After the widely recognized VYPER modulator range for broadcast applications, TeamCast is innovating again with unprecedented performances in satellite communication products for HTS broadband market"* says **Christophe Trolet**, Business Unit Manager at TeamCast.

This new **Tyger** modulator will be demonstrated on TeamCast's booth **#2129**.

**About TeamCast:**

TeamCast is a renowned and highly active member of the Digital TV ecosystem worldwide, with innovative technology offerings based on a solid expertise in Satellite and Terrestrial Digital TV transmission.

Created in 2003, and based at Rennes in France, TeamCast is deeply involved in the development, definition and verification of numerous broadcasting standards.

Today, major clients in the Broadcasting Industry from 50 different countries invest their confidence in TeamCast and its products. TeamCast has offices in Elmira (New York) and in Singapore to support the development of its business in North America and Asia, and to provide local sales and technical support services to its customers.
